Building A Computer Without A Computer.

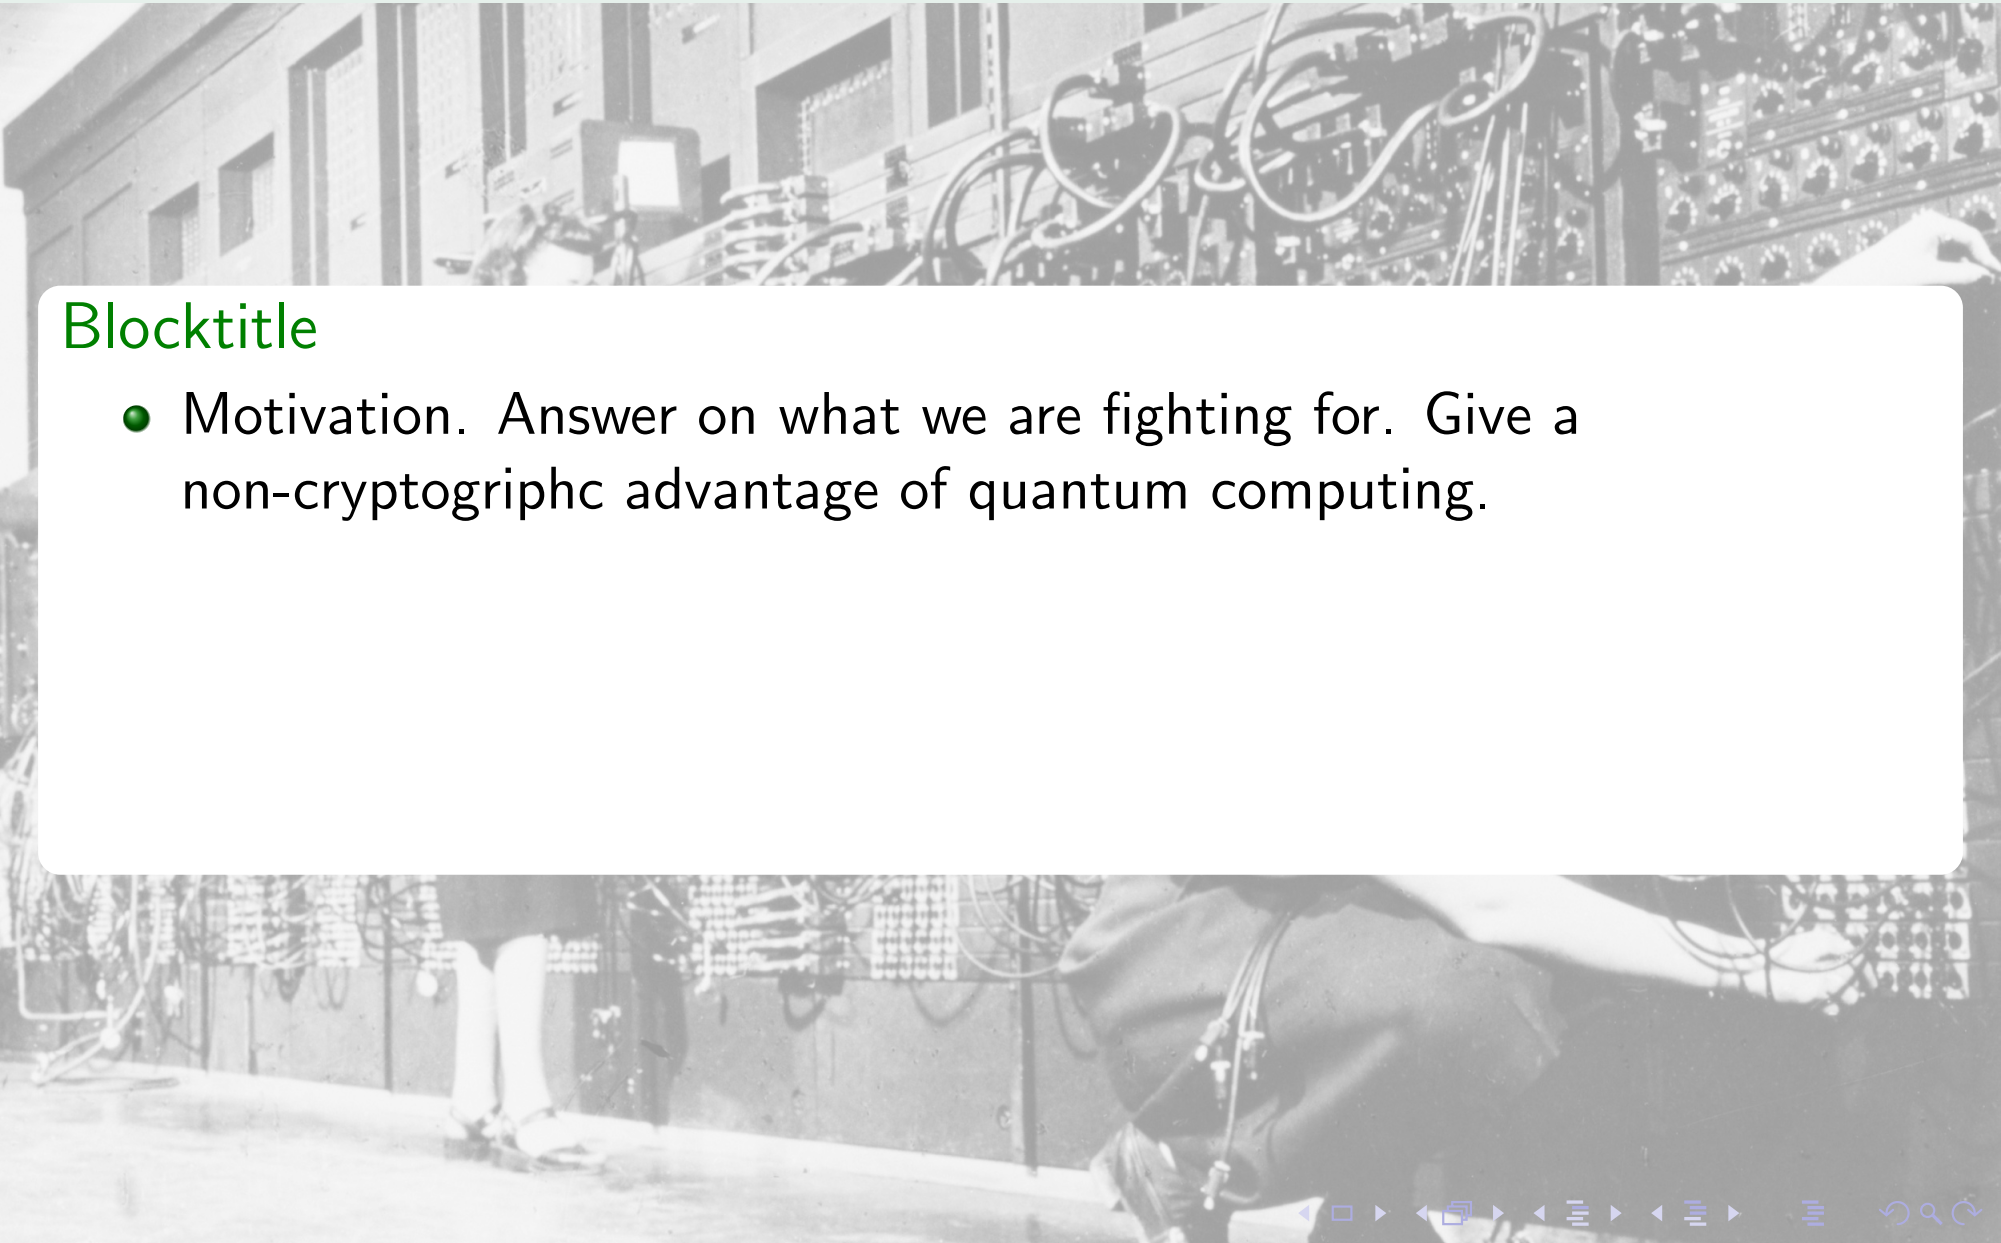
(Introduction To Error Crorrection And Fault Tolarnce Computation.)

D. Ponarovsky[1]

[1]Faculty of Computer Science
Hebrew University of Jerusalem

Qubit meeting 2022-23, Israel Quntum Tech Community.

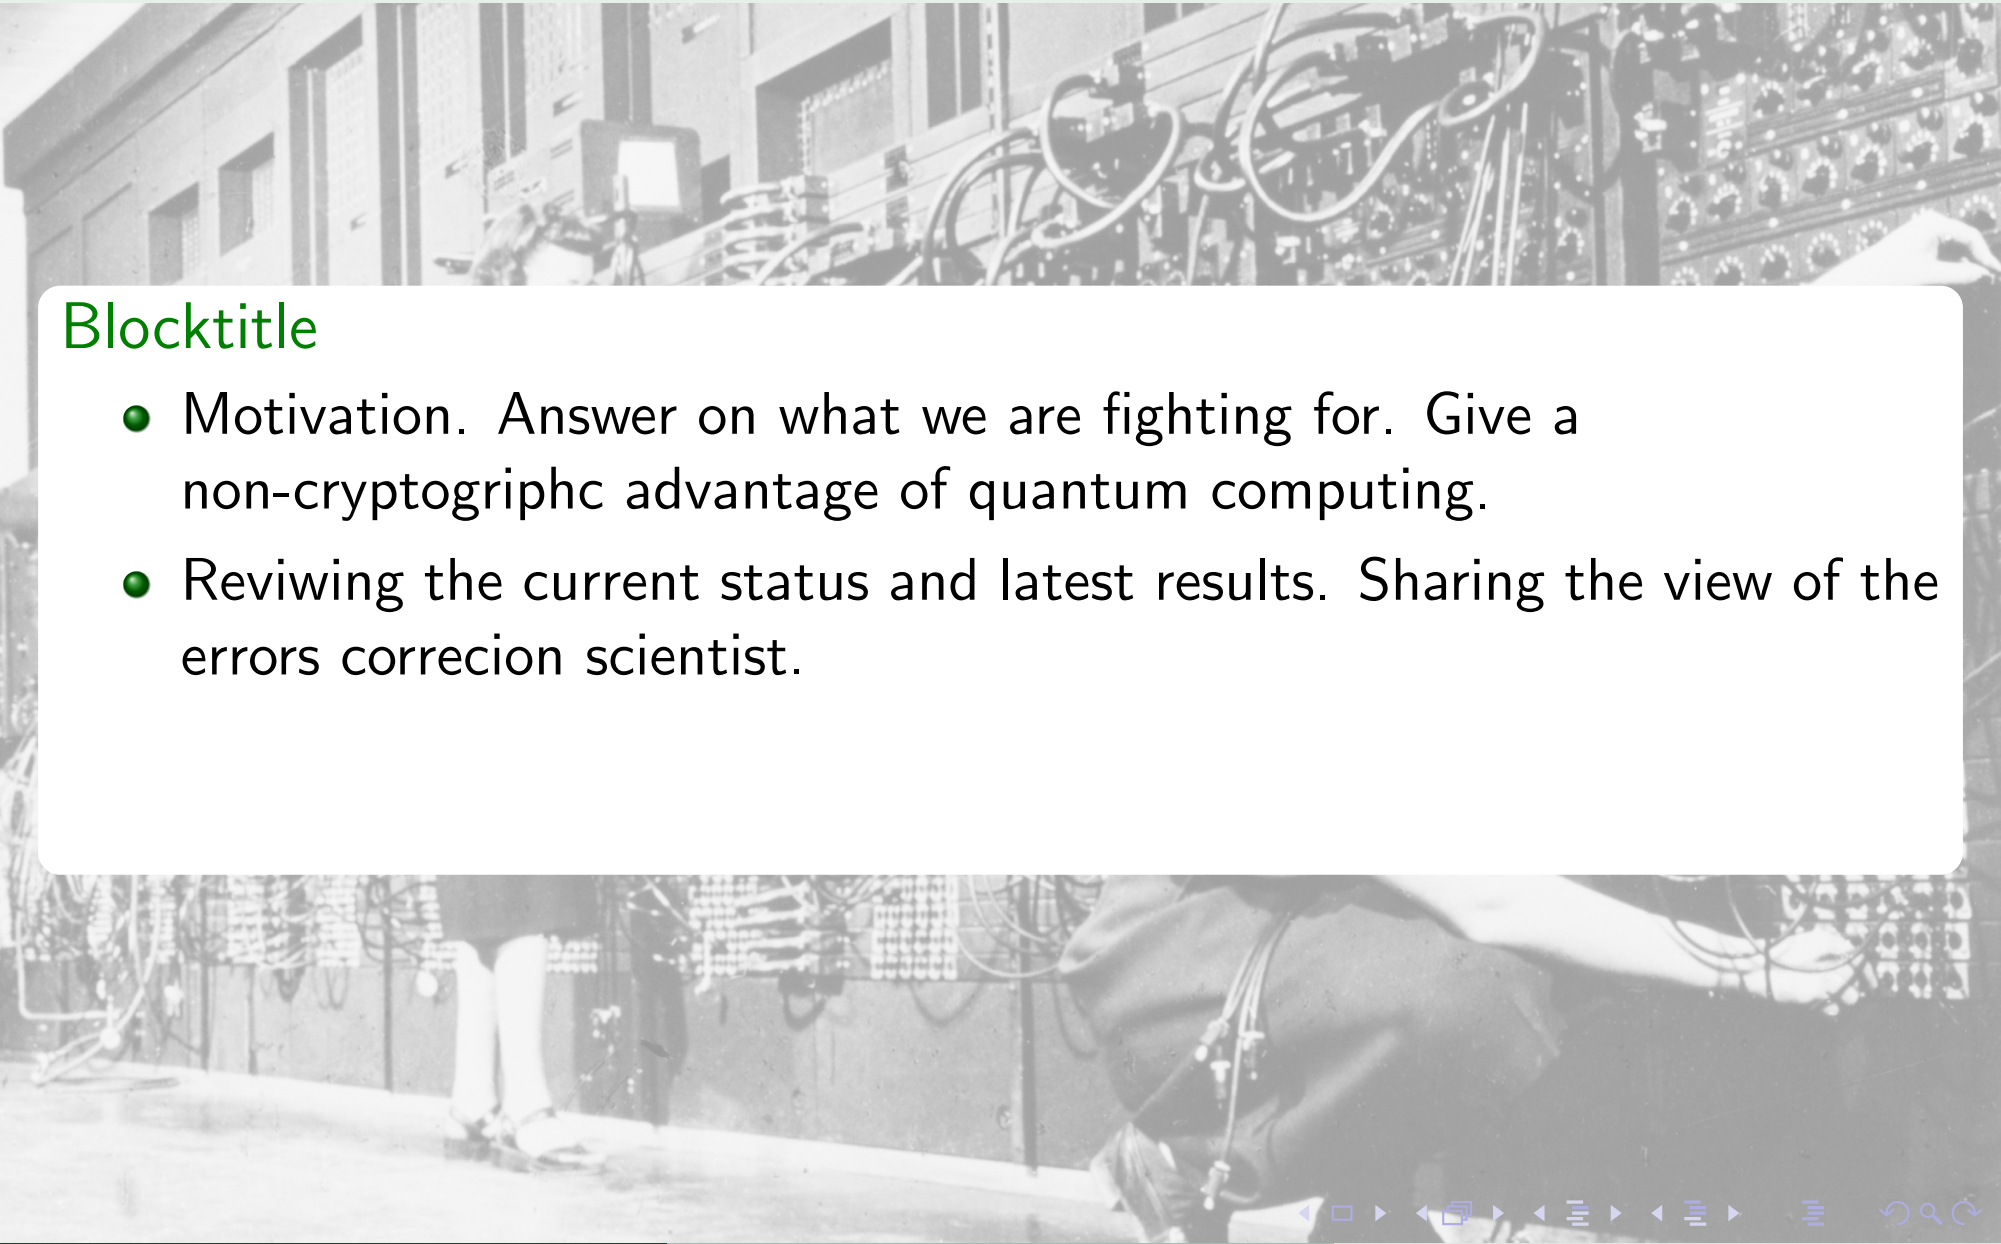
The Goal Of The Talk



Blocktitle

- Motivation. Answer on what we are fighting for. Give a non-cryptogriphc advantage of quantum computing.

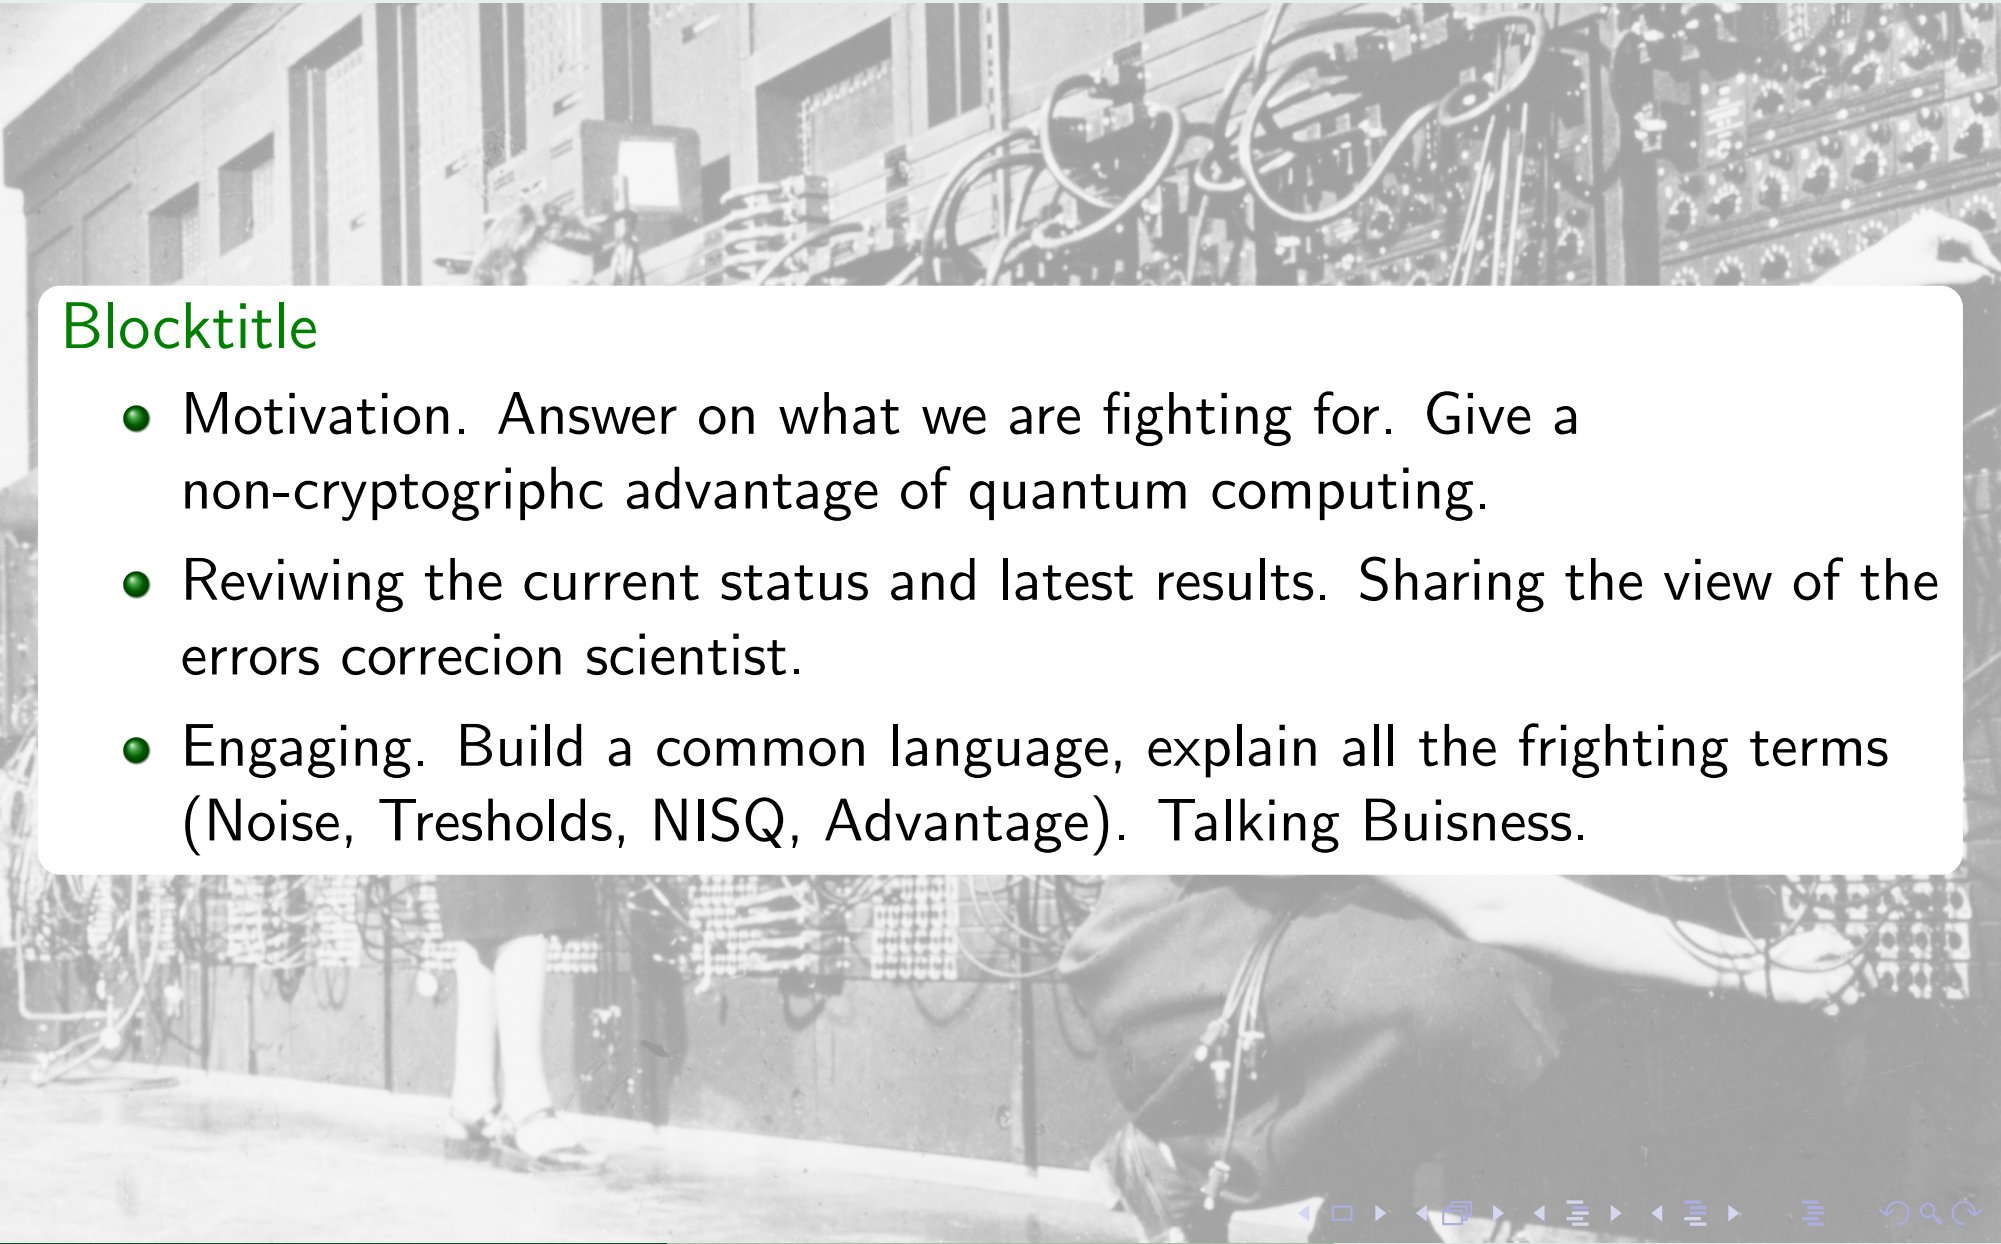
The Goal Of The Talk



Blocktitle

- Motivation. Answer on what we are fighting for. Give a non-cryptogriphc advantage of quantum computing.
- Reviwing the current status and latest results. Sharing the view of the errors correcion scientist.

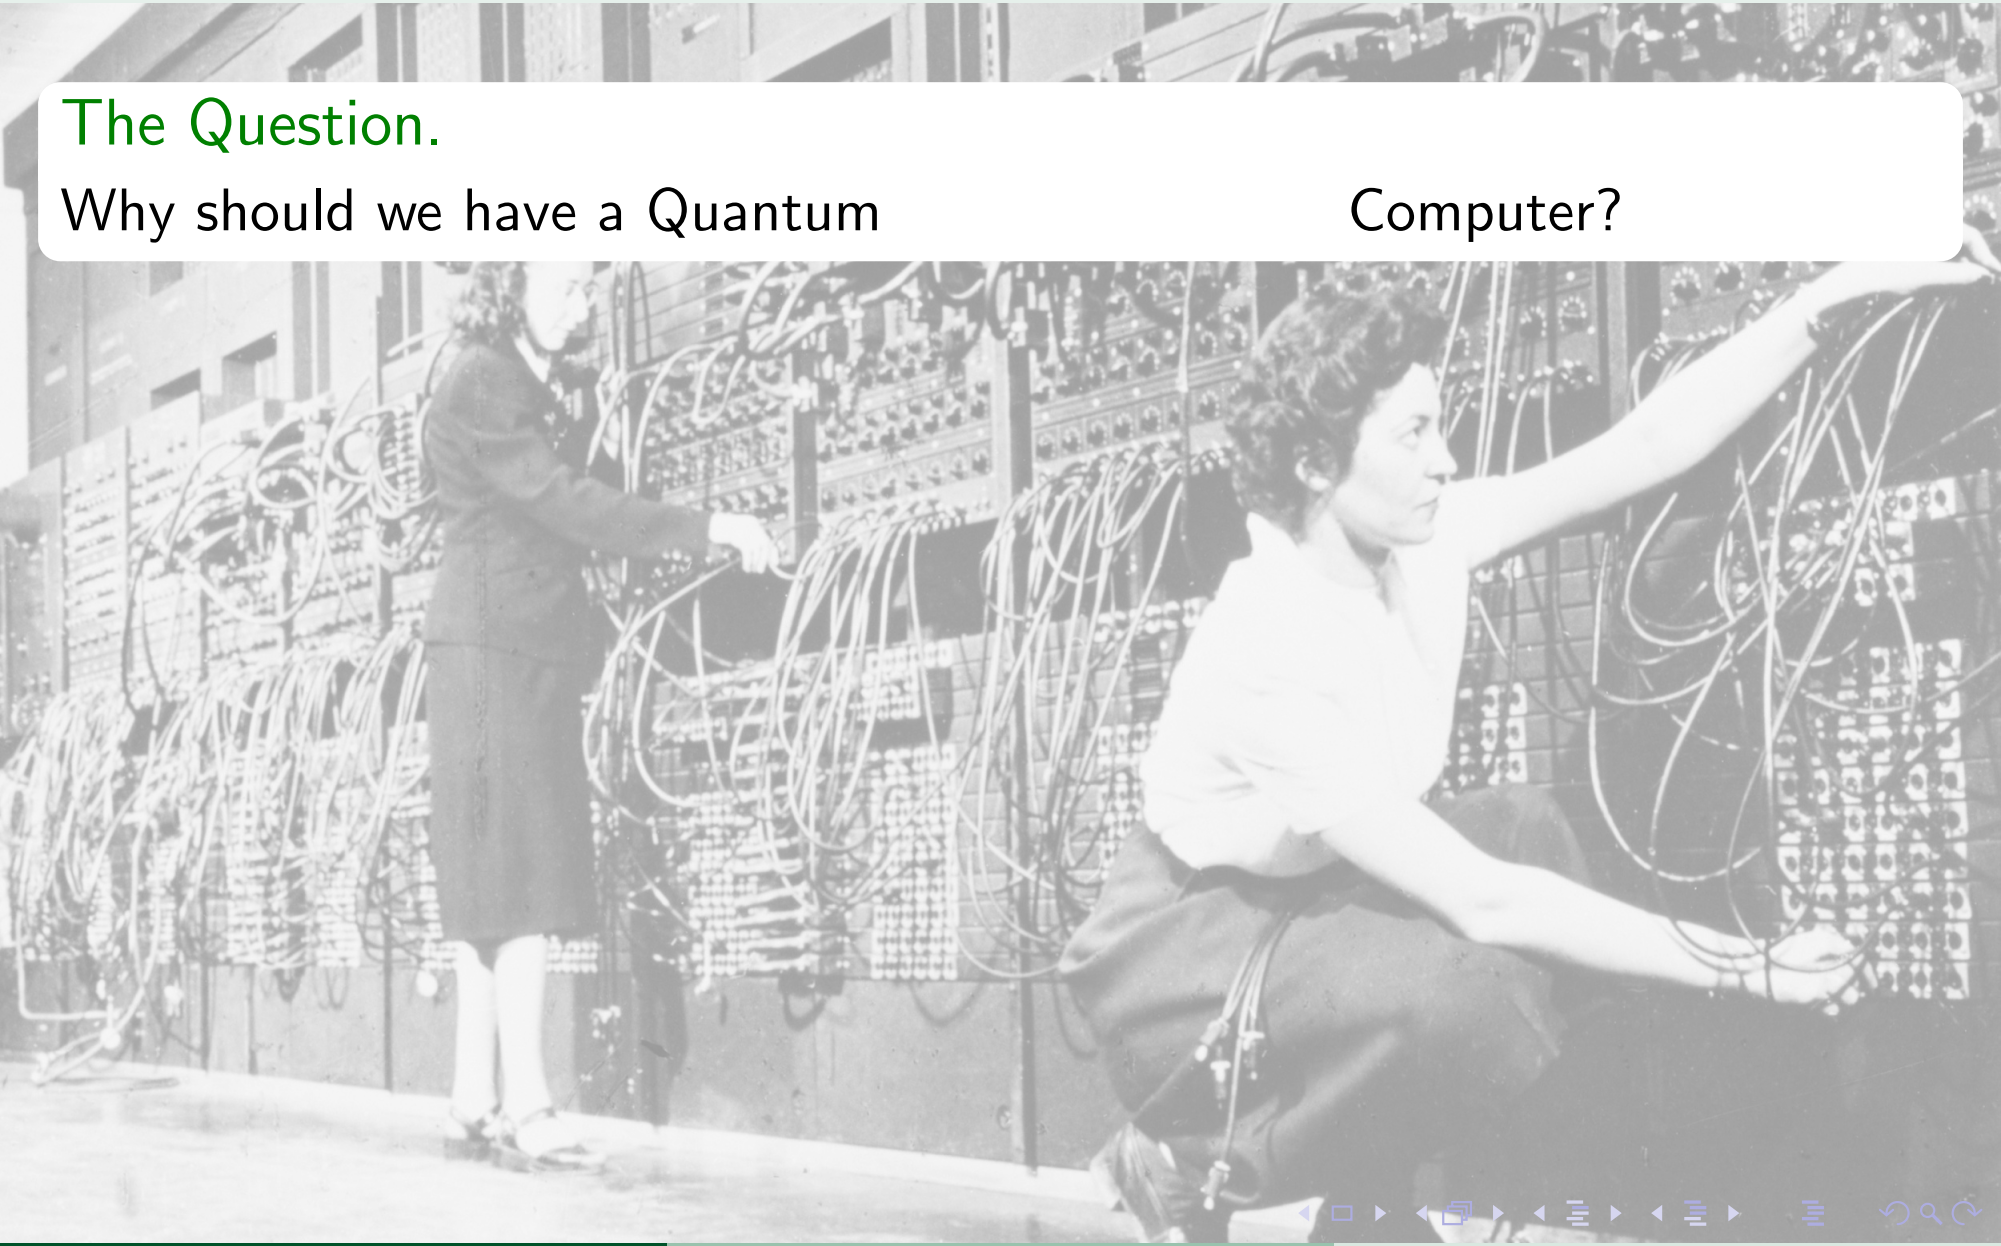
The Goal Of The Talk



Blocktitle

- Motivation. Answer on what we are fighting for. Give a non-cryptogriphc advantage of quantum computing.
- Reviwing the current status and latest results. Sharing the view of the errors correcion scientist.
- Engaging. Build a common language, explain all the frighting terms (Noise, Tresholds, NISQ, Advantage). Talking Buisness.

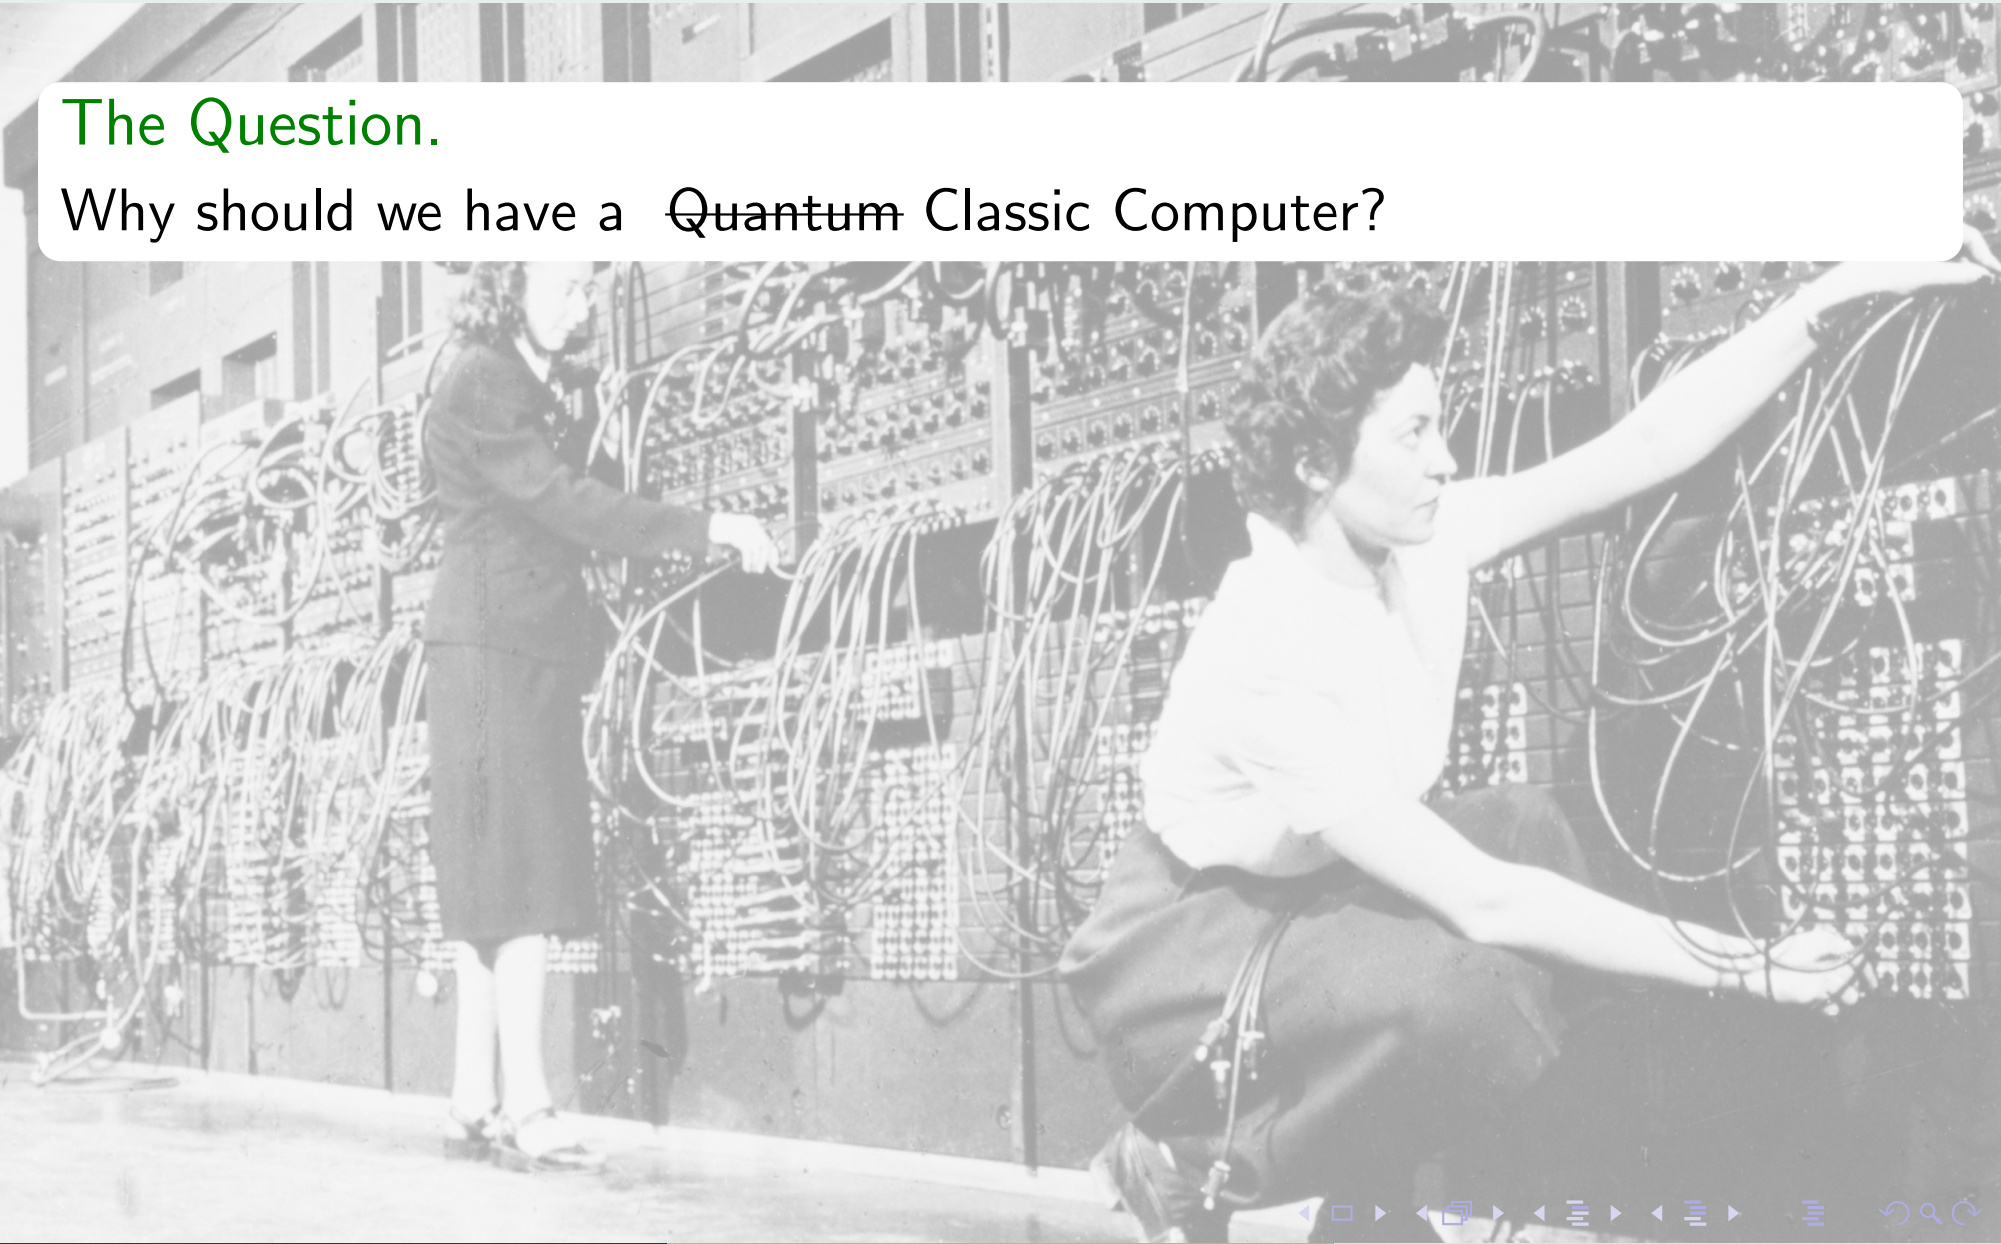
Motivation.



The Question.

Why should we have a Quantum Computer?

Motivation.



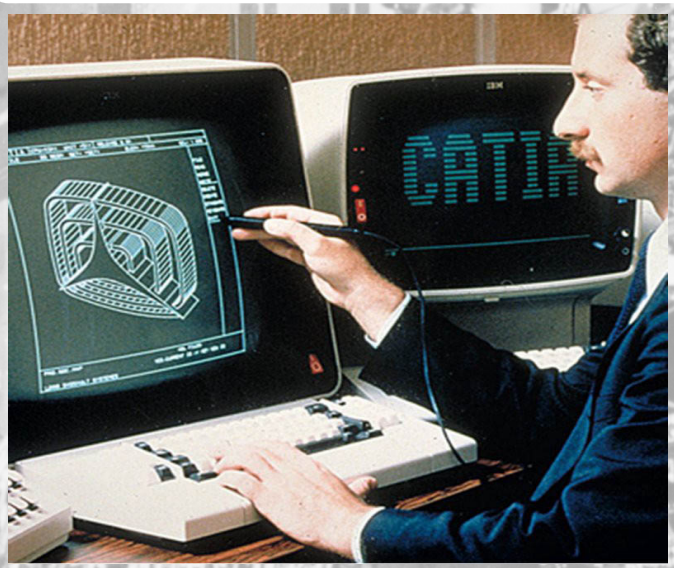
The Question.

Why should we have a ~~Quantum~~ Classic Computer?

Motivation.

The Question.

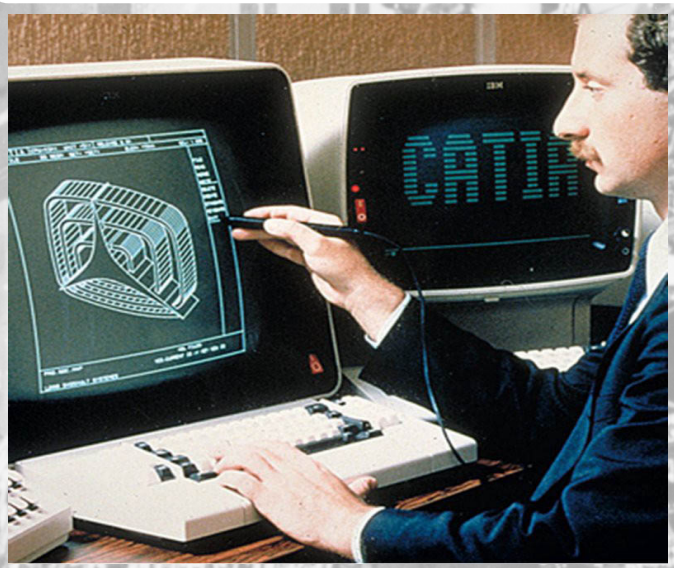
Why should we have a ~~Quantum~~ Classic Computer?

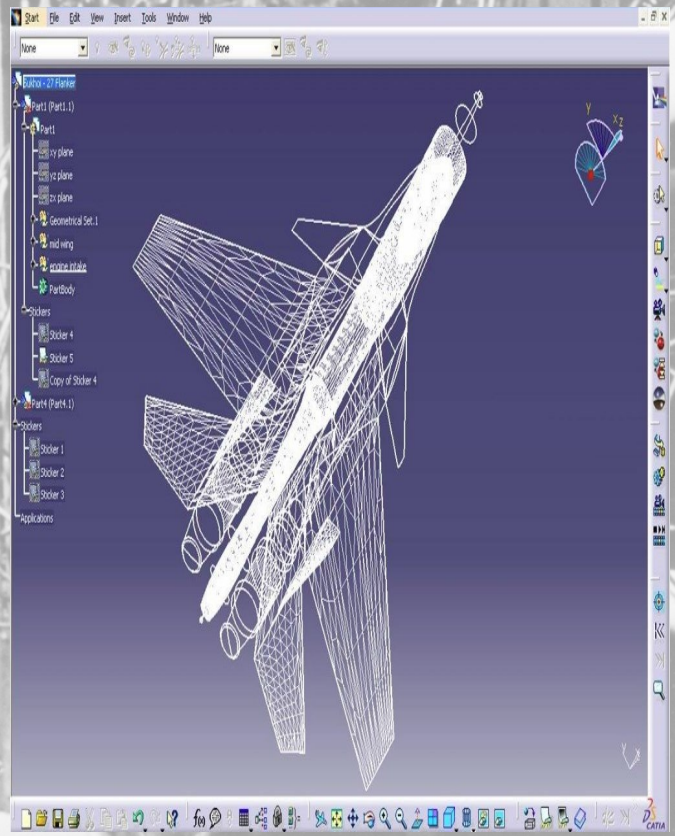


Motivation.

The Question.

Why should we have a ~~Quantum~~ Classic Computer?

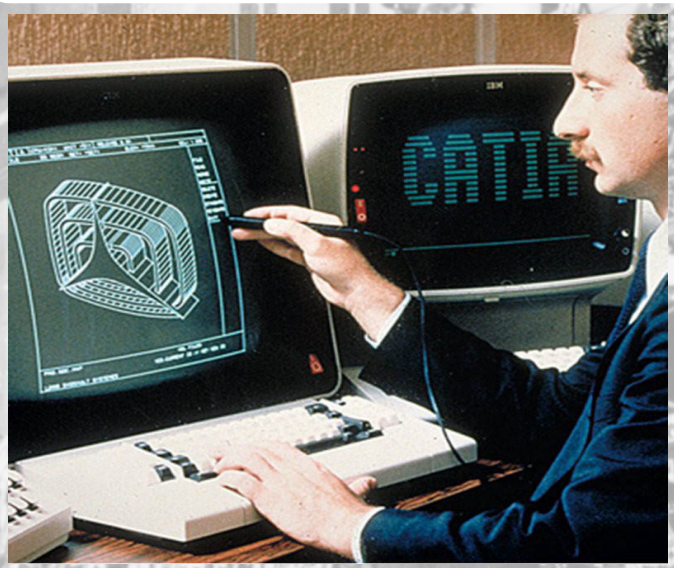


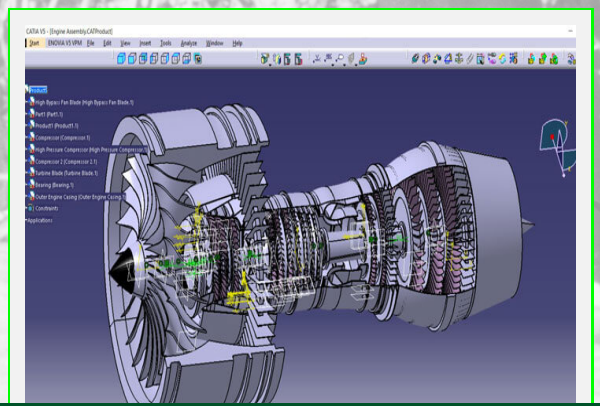


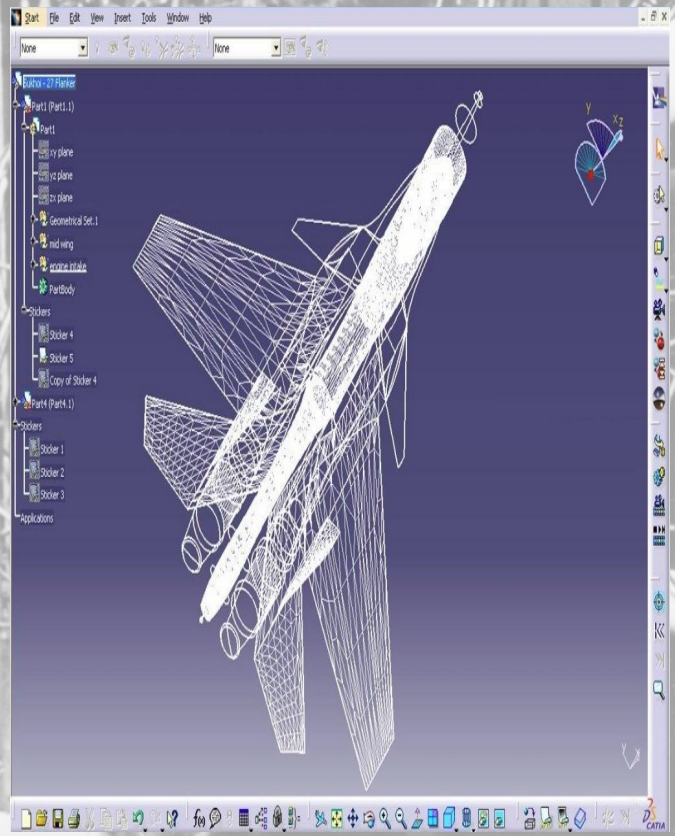
Motivation.

The Question.

Why should we have a ~~Quantum~~ Classic Computer?







About this Presention.

Sounds Grate, Whats is the catch?

here you can put any text/equation etc. $a^2 + b^2 = c^2$.

Wait a minute.

here you can put any text/equation etc. $a^2 + b^2 = c^2$.

This is the second slide

A bit more information about this

Some random text.
