- Brif Review of Coding.

Today.

- Brief Review of Coding.
- Quantum Error Correction Codes.

Today.

- Brief Review of Coding.
- Quantum Error Correction Codes.
- Good Classical Locally Testable Codes and Good Quantum LDPC.

blabla

BUS.

- A BUS is a communication pathway that transfers data between different components of a computer.

BUS.

- A BUS is a communication pathway that transfers data between different components of a computer.
- Buses connect IO devices such as keyboards, monitors, and printers to the computer's central processing unit (CPU).

BUS.

- A BUS is a communication pathway that transfers data between different components of a computer.
- Buses connect IO devices such as keyboards, monitors, and printers to the computer's central processing unit (CPU).
- Buses provide a standardized way for different components to exchange data with each other, simplifying device connection and ensuring compatibility.

Temporary page!

\LaTeX was unable to guess the total number of pages correctly. As there was some unprocessed data that should have been added to the final page this extra page has been added to receive it.

If you rerun the document (without altering it) this surplus page will go away, because \LaTeX now knows how many pages to expect for this document.
