

# Building A Computer Without A Computer.

( Introduction To Error Correction And Fault Tolerance Computation. )

D. Ponarovsky<sup>1</sup>

<sup>1</sup>Faculty of Computer Science  
Hebrew University of Jerusalem

Qubit meeting 2022-23, Israel Quantum Tech Community.

# The Goal Of The Talk

## Blocktitle

- Motivation. Answer on what we are fighting for. Give a non-cryptographic advantage of quantum computing.

# The Goal Of The Talk

## Blocktitle

- Motivation. Answer on what we are fighting for. Give a non-cryptographic advantage of quantum computing.
- Reviewing the current status and latest results. Sharing the view of the error correction scientist.

# The Goal Of The Talk

## Blocktitle

- Motivation. Answer on what we are fighting for. Give a non-cryptographic advantage of quantum computing.
- Reviewing the current status and latest results. Sharing the view of the errors correction scientist.
- Engaging. Build a common language, explain all the frightening terms (Noise, Thresholds, NISQ, Advantage). Talking Business.

# Motivation.

## The Question.

Why should we have a Quantum Computer?

# Motivation.

## The Question.

Why should we have a ~~Quantum~~ Classic Computer?

# Motivation.

## The Question.

Why should we have a Computer?

# Motivation.

## The Question.

Why should we have a Computer?

# Motivation.

The Question

Why should we have a computer?

# Sounds Grate, Whats is the catch?

here you can put any text/equation etc.  $a^2 + b^2 = c^2$ .

# Wait a minute.

here you can put any text/equation etc.  $a^2 + b^2 = c^2$ .

# This is the second slide

A bit more information about this

Some random text.
