

Understanding Quantumness And Testability.

D. Ponarovsky¹

Master-Exam-Huji.

Faculty of Computer Science
Hebrew University of Jerusalem

Today.

- Brif Review of Coding.

Today.

- Brief Review of Coding.
- Quantum Error Correction Codes.

Today.

- Brief Review of Coding.
- Quantum Error Correction Codes.
- Good Classical Locally Testable Codes and Good Quantum LDPC.

BUS.

- A BUS is a communication pathway that transfers data between different components of a computer.

BUS.

- A BUS is a communication pathway that transfers data between different components of a computer.
- Buses connect IO devices such as keyboards, monitors, and printers to the computer's central processing unit (CPU).

BUS.

- A BUS is a communication pathway that transfers data between different components of a computer.
- Buses connect IO devices such as keyboards, monitors, and printers to the computer's central processing unit (CPU).
- Buses provide a standardized way for different components to exchange data with each other, simplifying device connection and ensuring compatibility.
